

STAY INFORMED

Like many other diseases, such as the common cold or flu, anyone can catch the COVID-19. It is important not to stigmatize them. During these challenging times, it is important to rely on authoritative advice and avoid fake news or rumours that circulate on social media.

COVID-19 RESPONSE

At M4TS, the safety and wellbeing of our employees and contractors is the highest priority while ensuring the continuity of our business during these rapidly evolving and challenging times

With over 22 million confirmed cases worldwide, the COVID-19 pandemic is a global health crisis affecting all our projects, and all the countries in which we work.

The communities we serve are now faced with multiple challenges – from the risk of contracting the virus itself and its impact on overstretched health services, to the knock-on repercussions from containment measures on health, education and livelihoods systems.

We are adapting our work to respond to these new challenges – both now and in the longer-term – while ensuring that we continue to work towards our vision of M4TS.

To be the global leader and provider of material handling solutions to customers seeking high quality and reliable products.

OUR ACTIONS

One of the most effective ways we can help combat the spread of COVID-19, and limit its impact on fragile health systems, is by building people's knowledge and awareness. We're promoting preventative action in our work teams, including practising good hygiene and physical distancing measures, in line with national government guidelines and recognised best practice.

We are implementing a range of measures to help safeguard our workforce and prevent the spread of COVID-19 including:

- 1.- Mandatory use of face mask in company premises.
- 2.- Established a crisis management team, with a well-regarded epidemiologist acting as Special Advisor to M4TS.
- 3.- Social distancing and regular communications on best practice hygiene and health measures temperature screening and strict monitoring of access to company premises.
- 4.- Intensified cleaning at offices and sites, with hand sanitisers available.
- 5.- Working from home for our office staff
- 6.- Restrictions on non-essential visits to site and suspension of all non-essential business travel.
- 7.- Working closely with local and national health authorities in our operating countries.
